# Introduction

The BenQ Interactive Flat Panel offers an extra level of flexibility for device control through voice assistant. **Saffi** lets users control the flow of meetings by allowing them to start timers or search the Internet from anywhere in the room.

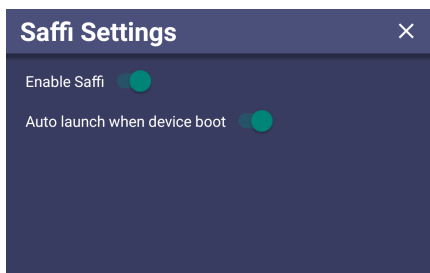

## Before you start

### Installing Saffi

Go to **BenQ App Store > BenQ Apps** to find **Saffi**. Tap the icon to download the software.

You can always open the app to manage settings for **Saffi**.

# Language settings

## Supported languages

English, Traditional Chinese, Spanish and French.

The language recognition of **Saffi** follows the system language of your BenQ display. If your language is currently not supported, the default language of **Saffi** will be English.

- Go to **System > Language & Input** to change your system language.

## Switching microphone input

You may choose to speak directly to the remote control's microphone or to the display's built-in microphone.

- Go to **Device > Current mic** to change your microphone input source.

## Start using Saffi

1. Press the voice command key (  ) on the remote control to activate Saffi.
2. Hold the key and say the [supported commands](#).
3. Release the button until you finish the command.

# Appendix: Command list

**Notes**

<Bold commands> are examples for your reference. You may fill in customized commands according to your needs.
